Yep. I'm available any time.

I'm adding just a bit to the text I sent you yesterday, to include a bit more on pets. Also, I read the article in the Denver Post this morning and noted Sean's quote about animals. It seems the community is very concerned about effects on pets/livestock. Although from my perspective the greater risk is to ecological receptors, one thing we can do is offer to set up some sort of communication with CSU's vet hospital, for both small animal and large animal concerns....

Subject: Ag questions

Thank you for what you put together.

Are you available to talk with the CO ag guy and, maybe, local USDA?
